

Global Economic Opportunity Notes

MCE Social Capital's Global Economic Opportunity Notes are a low-risk, fixed income product that currently provides MCE with over 51% of its financing needs. Notes offer investors an opportunity to fund MCE's lending to:

- **Financial service providers (FSPs)** that create opportunities and improve the economic security of their micro- and small business clients by offering financial products such as loans, savings, and insurance. These providers also offer ancillary services such as technical assistance and financial literacy programs to bolster their clients' growth.
- **Small and growing businesses (SGBs)** in agriculture, water, and sanitation, and clean energy that create sustainable jobs in rural economies, raise smallholder farmers' income, and increase climate resilience.

The majority of MCE's US\$64.8 million portfolio* is backed by US\$153 million in philanthropic guarantees from accredited investors. We have a strong track record with 100% payment of interest and principal to our investors since 2006.
